7. Click **Ok for changes to take effect** and click ok final ok to exit from Properties window.

Method 2

Disable UAC on Windows Vista:

1. Open up Control Panel, and type in "UAC" into the search box. You'll see a link for "Turn User Account Control (UAC) On or Off"

2. On the next screen you should uncheck the box for "Use User Account Control (UAC)", and then click on the OK button.

	NOK Cancel	٦L

3. You'll need to reboot your computer before the changes take effect, but you should be all done with annoying prompts.

For Windows 7:

- 1. Go to Start Menu -> Control Panel -> User Accounts
- 2. Click on User Account Control settings link.

Make changes to your user account

Create a password for your account

Change your picture

🛞 Change your account name

🛞 Change your account type

Manage another account Change User Account Control settings

3. Slide the slider bar to the lowest value (towards Never Notify), with description showing Never notify me.

Choose when to be notified about changes to your computer

- 4. Click OK to make the change effective.
- 5. Restart the computer to turn off User Access Control.
