# **Xantech Announces Multi-Room Web Controller**

***The new Multi-Room Web Controller is an integrated web server that allows flexible whole house control and benefits both installers and homeowners.***

**Sylmar, Calif. – June 1, 2008** – Xantech Corporation, a leading producer of innovative and reliable custom installation products, announces the Multi-Room Web Controller (‘MRWC’), an integrated web server that enables Xantech products to be controlled, monitored, and accessed from any computer connected to a Local Area Network (LAN) or the Internet.

The advantage of the ‘MRWC’ is a built in web page already programmed into the unit. The ‘MRWC’ benefits both the installer and the homeowner. It is plug-and-play ready, meaning with an established internal network, the ‘MRWC’ can be set up with no additional programming. Installers simply connect one end to the ‘MRC88’ serial port and the other end to an existing home network. No PC Programming or network configuration is required. For the homeowner, it allows flexible whole house control from any PC, wired or wireless, on the homeowner's network using the PC's Internet browser.

“We developed and delivered the ‘MRWC’ to be as easy as possible for both the installer and the homeowner. Having networked web control from any PC wired or wireless (or even a Wi-Fi cell phone) allows the homeowner to control any room from anywhere in (or around) the house,” says Rick Seagull, Director of Business Development for Xantech.

The ‘MRWC’ is capable of controlling Xantech’s award-winning ‘MRC88’ and ‘MRAUDIO8X8’ distribution amplifier from a web based platform. The ‘MRWC’ comes pre-configured for basic network configuration and 8 rooms of A/V Web Control. The retail price is \$599.

### **In Brief: Release Summary**

- The 'MRWC' allows Xantech products to be controlled, monitored, and accessed from any computer connected to a Local Area Network (LAN) or the Internet.
- No additional programming is required, simplifying installation.
- Homeowners benefit from flexible whole house control.
- The retail price for the 'MRWC' is \$599.

### **About Xantech Corporation**

*Established in 1969, Xantech Corporation ([www.xantech.com](http://www.xantech.com)) designs and manufactures an extensive range of state of the art A/V distribution and control systems, and component products, many of which have become the de facto industry standards. Since 1969, over two million of these systems have been installed worldwide.*

*The Xantech product line includes LCD Touchpanel Controllers, multi-zone, multi-source audio/video systems, multi-zone, multi-source pre-amplifiers, multi-channel audio amplifiers, infrared receivers, remote control switchers, interface modules, IR connecting blocks, IR emitters, volume controls and IR accessories. Products are sold to professional installers and distributors directly from Xantech.*

*Xantech's products are marketed in North and South America, Australia, New Zealand, Asia and Europe. Xantech is a subsidiary of Nortek, Inc. ([www.nortek-inc.com](http://www.nortek-inc.com)), a multinational manufacturer and distributor of building products for residential and commercial markets. Nortek, established in 1967, is headquartered in Providence, Rhode Island.*
